Art Unit: 2837

UNITED STATES DEPARTMENT OF COMMERCE
Patent and Trademark Office
ASSISTANT SECRETARY AND COMMISSIONER OF PATENTS AND
TRADEMARKS
Washington, D.C. 20231

Paper No:07192005
Application No:10/025097
Filing Date:December 19,2001

1. Claims 21,22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21, line 6, "load gearing" appears to be a typo but presently describes a feature not found in the specification.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Bauer Gerhard Dipl-ing (EP0103162 A2).

Bauer Gerhard Dipl-ing, herinafter referred to as Bauer, teaches in figures 1,2, a lifting device control device with measurements.

Art Unit: 2837

An analyzer 10 measures the spacing of optical marks 11-14 on cable 10 of a lifting stage. As illustrated, the optical marks are on the exterior of the cable 10. The analyzer 10 and associated control (figure 2) determine a degradation (load bearing, stretch) condition based on the spacing change of the optical marks detected by measuring means 21-24.

4. Claim 25 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 1-19,26-30 are allowed.

The placement of the marks on the jacket is not taught or reasonably suggested by the cited art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stuckey '666,'981 are cited to illustrate similar rope wear detectors for elevator wires.

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
